RE: [Job Title]

Dear Hiring Manager,

As an intermediate Software Engineer, the posting for [Job title] with [Company name] piqued my interest. When reviewing the job requirements and your website, I was excited to see that my qualifications and personal traits align with your needs and mission.

I bring a set of talents that I believe will be valuable to [Company name]. During my 2+ years of experience, I have honed the skills necessary to succeed in this position. I honed my abilities in agile development, ruby on rails, python and javascript, providing a solid foundation for the [Job title] position. My collaboration, people-centric nature, and eagerness to please have afforded me excellent communication skills.

Please review my resume for a complete collection of my work history. I am very excited by this career opportunity and am interested in meeting with you to discuss further. I'm hoping to discuss how my personality and work history fit the [Job title] role.

Thank you for your time and consideration.
Sincerely,

Daniel Shotonwa

Profile

Hello! I'm a Technophile and Software Developer specializing in developing web applications, testing and making the internet a more beautiful and positive place. I am a fast learner who loves learning new concepts and technology. Energetic Programmer with a solid history of achievement in Programming. Motivated leader with strong organization and prioritization abilities.

Experience

Software Engineer   Fluxx
July 2019 - date   SanFrancisco

- Improved Fluxx Grant management system by adding new features and infrastructure, enhancing customers experience.
- Wrote highly maintainable, solid code in Ruby and Javascript for Fluxx grant system that formed a core framework and has won consistent praise from subsequent developers.
- Modified existing software to correct coding errors, upgrade interfaces and improve overall performance.

Software Developer   Andela
Nov 2018 - date   Lagos, Nigeria

- Tested websites and performed troubleshooting before deployment.
- Built, tested and deployed scalable, highly available and modular software products.
- Wrote clean, clear and well-tested code for various projects such as VOF and Authors Haven. - Contributed fully to design assessments, code reviews and brainstorming sessions.
- I worked on the engineering team at Andela building an application used to bring prospective talent into Andela. I was part of a team that delivered survey builder initiative and other quality initiatives automating different processes.

Software Developer   AppWorkforce
March 2016 - January 2017   Yaba, Lagos

- Implemented utility methods and classes in an existing application
- Refactored existing classes to make it lean and follow the SRP principles.
- Using python scripts to automate manual process
